

I would like to comment on the FCC's proposal on preempting Indiana's telemarketer "no call" law. Please leave the law as it stands. Telemarketer calls used to be a daily occurrence at our home, often we would receive calls as late as 10:00 PM, now with the law in place, we receive very few calls. While we can understand a companies desire to reach potential customers, the companies must also understand that a persons individual privacy is every Americans right guaranteed by the Constitution. Please leave our law as it stands!!.....Joseph M Barnett
